UPDATE: Back to school advice - flu, COVID-19 and scarlet fever

As students return to school following the Christmas break, UK Health Security Agency (UKHSA) is reminding people that winter illnesses continue to circulate at high levels - Last updated 2 January 2023.

Since March 2022 when the final Covid restrictions were lifted the UK Health and Security Agency (UKHSA) has advised that COVID-19 should be managed like other respiratory infections, such as flu.

COVID-19 presents a low risk to children and young people. **There are no longer specific rules relating to COVID-19 in schools.**

As individuals are now mixing in an open society, regular testing within a setting is no longer as effective as it once was.

Following simple steps can help protect children, minimise the spread of illness in education and childcare settings and protect wider communities.

Flu and coronavirus (COVID-19) are currently circulating at high levels and are likely to continue to increase in coming weeks. High numbers of scarlet fever, which is caused by group A streptococcus, also continue to be reported.

Professor Susan Hopkins, Chief Medical Adviser at the UK Health Security Agency (UKHSA), said:

It's important to minimise the spread of infection in schools and other education and childcare settings as much as possible. If your child is unwell and has a fever, they should stay home from school or nursery until they feel better and the fever has resolved.

Helping children to learn about the importance of good hand hygiene is also key, so practice regular handwashing at home with soap and warm water. Catching coughs and sneezes in tissues then binning them is another simple way to help stop illness from spreading.

Adults should also try to stay home when unwell and if you do have to go out, wear a face covering. When unwell don't visit healthcare settings or visit vulnerable people unless urgent.

The symptoms of COVID-19 and other respiratory infections are very similar. It is not possible to tell if you have COVID-19, flu or another respiratory infection based on symptoms alone.

Symptoms of COVID-19, flu and common respiratory infections include:

- continuous cough
- high temperature, fever or chills
- loss of, or change in, your normal sense of taste or smell
- shortness of breath
- unexplained tiredness, lack of energy
- muscle aches or pains that are not due to exercise
- not wanting to eat or not feeling hungry
- headache that is unusual or longer lasting than usual
- sore throat, stuffy or runny nose
- diarrhoea, feeling sick or being sick

What to do if you have symptoms of a respiratory infection, including COVID-19, and have not taken a COVID-19 test.

Try to stay at home and avoid contact with other people

If you have symptoms of a respiratory infection, such as COVID-19, and you have a high temperature or do not feel well enough to go to work or carry out normal activities, try to stay at home and avoid contact with other people, until you no longer have a high temperature (if you had one) or until you no longer feel unwell.

When children and young people with symptoms should stay at home and when they can return to education

Children and young people with mild symptoms such as a runny nose, sore throat, or slight cough, who are otherwise well, can continue to attend their education setting.

Children and young people who are unwell and have a high temperature should stay at home and avoid contact with other people, where they can. They can go back to school, college or childcare, and resume normal activities when they no longer have a high temperature and they are well enough to attend.

What measures should schools be taking to stop the spread?

As well as following the UKHSA guidance signposted, all settings should have in place baseline infection prevention and control measures that will help to manage the spread of infection:

- Reinforcing good hygiene practices such as regular hand washing and cleaning.
- Ensuring occupied spaces are well-ventilated and let fresh air in.

POLICY STATEMENT

Learning Opportunities is mindful of the need to safeguard the well-being of all students, staff and visitors to the school and will ensure that First Aid arrangements are managed in compliance with the management of Health and Safety (First Aid) Regulations 1981 and Education (Independent School Standards) (England) Regulations 2014.

This policy outlines the school's responsibility to provide adequate and appropriate first aid to students, staff, parents / carers and visitors, and the procedures in place to meet that responsibility. First aid can save lives and prevent minor injuries becoming major. The school will ensure that first aid is administered in a timely and competent manner.

It is acknowledged that major and minor incidents / accidents can take many forms and can happen without warning. No plan can provide for every eventuality; however, the response to any incident is handled within an agreed management framework which has been put in place for the day to day running of the school.

This policy provides an overview of the statutory requirements and how these are met in school. All safeguarding and child protection policy guidelines must be adhered to both on and off the school site, when first aid is administered.

The responsibility for drawing up and implementing the First aid policy is delegated to the Head Teacher, including informing staff and parents / carers. However, implementation remains the responsibility of all staff in our school in order to keep students healthy, safeguarded and protected whenever they are in our care.

First aid is the help given to someone who is injured or ill, to keep them safe until they can get more advanced medical treatment by seeing a doctor, health professional or by going to hospital.

This policy should be read in conjunction with the Supporting Students with Medical Conditions Policy and the School's H&S and First Aid Risk Assessment policies.

This policy is shared with all employees during their induction to ensure they are familiar with the school's first aid procedures.

AIMS

The aim of providing First Aid is to save lives and to ensure that minor injuries and illnesses do not escalate into major ones.

An accident is an unplanned, uncontrolled event, which causes, or could cause injury, damage or loss. In most cases accidents can be avoided and it is our intentions to prevent as many as possible.

The aims of our first aid policy are to:

- Ensure the health and safety of all staff, students and visitors
- Ensure that staff are aware of their responsibilities with regards to health and safety
- Provide a framework for responding to an incident and recording and reporting the outcomes

To achieve our Policy Aims, Learning Opportunities will:

- Carry out a suitable and sufficient assessment of the risks posed to persons in the event that they suffer an accident, injury or ill health.
- Appoint sufficient First Aiders (qualified by training) to take charge of first aid. The certification will be reviewed regularly to ensure that it is current. The School will maintain a record of employees who have undergone first aid training, which can be requested from the Leadership Team.
- Provide information to employees, students and parents / carers on the arrangements for first aid.
- Have a readily available and suitably stocked first aid boxes
- Have a procedure for managing accidents, including immediate liaison with emergency services, medical professionals and parents / carers.
- Ensure that an accident record file is maintained and every incident that requires first aid is recorded and filed including any treatment given.
- Ensure that a holder of a current, relevant First Aid certificate accompanies all off-site activities.
- Ensure notices are clearly visible throughout the School indicating the location of the first aid boxes and the names of the School's First Aiders.
- Review and monitor arrangements for first aid on regular basis.

LEGISLATION & GUIDANCE

This policy is based on Department for Education First aid in schools, early years and FE - updated February 2022, and the following legislation:

- The Health and Safety (First Aid) Regulations 1981, which state that employers must provide adequate and appropriate equipment and facilities to enable first aid to be administered to employees, and qualified first aid personnel
- The Management of Health and Safety at Work Regulations 1999, which require employers to carry out risk assessments, make arrangements to implement necessary measures, and arrange for appropriate information and training
- The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) 2013, which state that some accidents must be reported to the Health and Safety Executive (HSE), and set out the timeframe for this and how long records of such accidents must be kept
- Social Security (Claims and Payments) Regulations 1979, which set out rules on the retention of accident records
- The Education (Independent School Standards) Regulations 2014, which require that suitable space is provided to cater for the medical and therapy needs of pupils

CURRENT PRACTICE

The Leadership Team (LT) undertakes an annual review of the Schools first aid needs risk assessment to ensure that adequate provision is available given the size of our school, student / staff numbers, our specific location and the needs of individuals.

Our risk assessment includes consideration of students and staff with specific conditions and major illnesses, such as asthma and epilepsy, takes account of an analysis of the history of accidents in our school, as well as the identification of specific hazards. It also includes careful planning for any trips and visits, including residential and higher risk activities, which always include a suitably trained first aider.

We ensure that first aid provision is available at all times, including off-site activities, during PE, and at other times when the school facilities are used.

We keep a written record in our accident book of all accidents or injuries and first aid treatment and inform parent(s)/carer(s) of any accident or injury on the same day, or as soon as reasonably practicable, of any first aid treatment.

PROVIDING INFORMATION

Learning Opportunities informs all staff of the first-aid arrangements. This includes the name and location of first aiders and appointed persons, location of first aid equipment and facilities, and procedures for monitoring and reviewing the school's first-aid requirements.

Newly appointed staff are provided with first-aid information as part of their Induction Programme, details of which are also available within the Health & Safety Handbook produced in conjunction with Learning Opportunities Health & Safety Consultants (Peninsula Business Services).

RISK ASSESSMENT

The Management of Health and Safety at Work Regulations 1999 require employers to make a suitable and sufficient assessment of the risks to the health and safety of their employees at work, and others who may be affected by their undertaking, and to identify what measures they need to take to prevent or control these risks.

Learning Opportunities, as a school, generally falls into the lower risk category, although it is also appreciated that some of our areas of activity may fall into the medium risk category. Our first-aid provision is based on the level of risk determined by the risk assessment undertaken for given activities.

ROLES & RESPONSIBILITIES

Proprietor will:

- ensure that first aid is administered in a timely and competent manner by the drawing up and effective implementation of a written first aid policy.
- Ensure that the welfare of students at the school is safeguarded and promoted by the drawing up and effective implementation of a written risk assessment policy;
- Ensure that appropriate action is taken to reduce risks that are identified.
- Under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR) ensure that relevant incidents are reported to the HSE

In practice, most of the day-to-day functions of managing health and safety are delegated and shared between the Head Teacher & Deputy Head, who are responsible for the implementation of this policy, including ensuring that:

- the health, safety and welfare of students, employees and any other individuals who may be on the school premises are fully covered.
- an appropriate number of trained first aid personnel are present in the school at all times
- first aiders have an appropriate qualification, keep training up to date and remain competent to perform their role
- all staff are aware of first aid procedures
- appropriate risk assessments are completed and appropriate measures are put in place
- in the event of an accident occurring, an accident and incident report form is completed.
- parents / carers are advised of the school's health and safety policy, including arrangements for first aid
- monthly checks are made of First Aid containers, in addition to restocking as required following use.

First Aiders Main Duties

First aiders hold a valid first aid certificate and are trained and qualified to carry out their role.

First Aiders have completed a training course approved by the Health and Safety Executive (HSE) and are expected:

- give immediate help to casualties who are injured or ill.
- to keep the person safe until they can get more advanced medical treatment.
- when appropriate, ensure that an ambulance or other professional medical help is called.

These are the seven things a first aider needs to do:

1. **Assess the situation quickly and calmly:**
 - Safety: Are you or they in any danger? Is it safe for you to go up to them?
 - Scene: What caused the accident or situation? How many casualties are there?
 - Situation: What's happened? How many people are involved and how old are they? What do you think the main injuries could be?
2. **Protect yourself and them from any danger:**
 - Always protect yourself first - never put yourself at risk
 - Only move them to safety if leaving them would cause them more harm
 - If you can't make an area safe, call 999 for emergency help
3. **Prevent infection between you and them:**
 - Wash your hands or use alcohol gel
 - Wear disposable gloves
 - Don't touch an open wound without wearing gloves
 - Don't breathe, cough or sneeze over a wound or a casualty
4. **Comfort and reassure:**
 - Stay calm and take charge of the situation
 - Introduce yourself to them to help gain their trust
 - Explain what's happening and why
 - Say what you're going to do before you do it
5. **Assess the casualty:**
 - If there's more than one casualty, help those with life-threatening conditions first
 - Start with the Primary Survey and deal with any life-threatening conditions
 - Then, if you've dealt with these successfully, move on to the Secondary Survey
6. **Give first aid treatment:**
 - Prioritise the most life-threatening conditions
 - Then move on to less serious ones
 - Get help from others if possible
7. **Arrange for the right kind of help:**
 - Call 999 for an ambulance if you think it's serious
 - Take or send them to hospital if it's a serious condition but is unlikely to get worse
 - For a less serious condition call 111 for medical advice
 - Suggest they see their doctor if they're concerned about a less serious condition
 - Advise them to go home to rest, but to seek help if they feel worse
 - Stay with them until you can leave them in the right care.

Appointed Persons

An appointed person is someone who:

- takes charge when someone is injured or becomes ill.
- takes charge of first aid equipment and ensure that such equipment is appropriately maintained.
- ensures that an ambulance or other professional medical help is summoned when appropriate

Appointed persons are **not** first aiders. They should **not** give first-aid treatment for which they have not been trained. However, Learning Opportunities ensure that appointed persons receive bespoke 1 day emergency first-aid training / requalification training.

All staff

All members of staff have responsibility to take reasonable steps to ensure that no person in their care is exposed to unacceptable risk, and that they carry out activities in accordance with training and instructions. All staff must know what action to take if an accident or emergency occurs, including their responsibility for reporting accidents, near misses and dangerous situations.

It is acknowledged that in general the consequence of taking no action is likely to be more serious than that of trying to assist in an emergency. **Therefore, staff will:**

- use their best endeavours, particularly in emergencies, to secure the welfare of the student(s) in the same way that parent / carers might be expected to act towards their children.
- Ensure they follow first aid procedures
- Ensure they know who the first aiders in school are
- notify the leadership team of all accidents and treatments
- Complete accident reports for all incidents they attend where a first aider is not called
- inform the leadership team when First Aid equipment has been used and needs to be re-stocked.
- Inform the headteacher of any specific health conditions or first aid needs.

MEDICAL EMERGENCIES

All members of staff who have contact with students who have diagnosed medical conditions will be informed about the best course of action if a student becomes seriously ill and needs emergency treatment - **refer to Supporting Students with Medical needs policy.**

The student and the parents / carers will be informed about the school's arrangements and where appropriate details will be recorded in a health care plan.

The school will call an ambulance before contacting parents / carers if a student becomes seriously ill - this applies to all students and not only those with health care plans.

The school will arrange for a competent member of staff to travel to hospital in an ambulance and to act in loco parentis until the parent / carer arrives. The member of staff in loco parentis will have the right to sanction emergency procedures as advised by medical staff in the ambulance or at the hospital.

EMERGENCY PROCEDURES

Ambulance

If the first member of staff present at an incident judges that an ambulance should be called, he or she should do so immediately, by calling the emergency services on 999, without hesitation and without waiting for the First Aider to arrive at the scene.

Staff should always call an ambulance if there is:

- a serious injury or illness.
- serious breathing difficulty.
- any significant head injury.
- major bleeding.
- a period of unconsciousness (excluding a faint);
- a severe burn; or
- an obvious open fracture or dislocation.

Whenever possible, an adult should remain with the casualty until help arrives and other staff can be called upon to help with moving away any students present.

If an ambulance is called, a member of the LT should be notified immediately in order to open the relevant gates and direct the ambulance crew to the casualty's location.

Parents/next of kin of the casualty should be notified and a responsible adult should go to hospital with the casualty.

In-School First aid procedures

In the event of an accident resulting in injury:

- The closest member of staff present will assess the seriousness of the injury and seek the assistance of a qualified first aider, if appropriate, who will provide the required first aid treatment
- The first aider, if called, will assess the injury and decide if further assistance is needed from a colleague or the emergency services. They will remain on scene until help arrives
- The first aider will also decide whether the injured person should be moved or placed in a recovery position
- If the first aider judges that a student is too unwell to remain in school, parents / carers will be contacted and asked to collect their child. Upon their arrival, the first aider will recommend next steps.
- If emergency services are called, a member of the Leadership Team will contact parents / carers immediately
- The first aider will complete an accident report form on the same day or as soon as is reasonably practical after an incident resulting in an injury. The report will include as much detail as possible, such as weather conditions, surface condition, witnesses (statements to be collected) etc.

Off-site procedures

When taking students off the school premises, staff will ensure they always have the following:

- A fully charged mobile phone

- A portable first aid kit
- Individual student's medication such as inhalers, epi-pens etc.
- Information about the specific medical needs of students
- Parents/carers' contact details

Risk assessments will be completed by the Group Leader prior to any educational visit that necessitates taking students off school premises.

There will always be at least one first aider on school trips and visits.

Treatment of Head Injuries (Refer to Appendix A)

Children often fall and bang themselves, and thankfully, most bangs to the head are harmless events and can be dealt with by the supervising adult.

Emergency First Aiders should be sought if the student:

- becomes unconscious.
- is vomiting or shows signs of drowsiness.
- has a persistent headache.
- complains of blurred or double vision.
- is bleeding from the nose or ear; and/or
- has pale yellow fluid from the nose or ear.

If any of the above symptoms occurs urgent medical attention is needed. Parents / carers should be contacted and the emergency services too.

In the event of an accident in which the student cannot stand up unaided, he/she should be left in the position that he/she was found (even if this is in the toilets or playground) so long as it is safe to do so.

Head Injuries can be potentially life threatening and do not always show clear visual signs of injury.

Reporting procedure to Parents / Carers

The school will always inform parents / carers of a bumped head initially via a telephone contact. Parents / carers will be spoken to directly. Where necessary they will be asked to collect their child. Where we are unable to contact parents / carers we will contact the Emergency Person (details available on admission form / student data base). A log will be kept in the school Office to ensure repeat phone calls are made when no parent / carer has been spoken to in person.

Treatment of suspected breaks/fractures

The things to look for are:

- Swelling
- Difficulty moving
- Movement in an unnatural direction
- A limb that looks shorter, twisted or bent
- A grating noise or feeling
- Loss of strength
- Shock

If it is an open fracture:

- cover the wound with a sterile dressing and secure it with a bandage. Apply pressure around the wound to control any bleeding.
- support the injured body part to stop it from moving. This should ease any pain and prevent any further damage.
- once you've done this, call 999 for medical help.
- while waiting for help to arrive, don't move the injured person unless they're in immediate danger.
- keep checking the casualty for signs of shock.

First Aid training states that clothing should only be removed if absolutely necessary. Where clothing needs to be removed which could cause a safeguarding issue then two members of staff should be present. Only one needs to be first aid trained. However, if waiting for a second member of staff puts a student's life in danger then the first aider should not withhold treatment.

Asthma

Where there is a need for a student to use an inhaler, they will generally remain with the student.

ALWAYS SEEK THE ADVICE/ATTENTION OF A QUALIFIED FIRST AIDER IN THE EVENT OF AN ASTHMA ATTACK

Epi-Pens

All Epi-Pens are labelled and kept in a secure place in close proximity to the student - staff will ensure that the Epi-Pen accompanies the student on any off-site activities. Most staff members have Anaphylaxis and Epi Pen training.

Anyone can administer an Epi-Pen in an emergency if the adult/student is unable to do it themselves. Should a member of staff, who has not had the training have to do this, then the emergency services must be informed at the same time as the Epi-Pen is administered.

FIRST AID TRAINING

Learning Opportunities carefully consider, and review annually, the training needs of staff to ensure that suitable staff are trained and experienced to carry out first aid duties in our school. In particular we consider the following skills and experiences:

- Reliability, communication and disposition,
- Aptitude and ability to absorb new knowledge and learn new skills,
- Ability to cope with stressful and physically demanding emergency procedures,
- Normal duties are such that they may be left to go immediately and rapidly to an emergency, and
- Need to maintain normal operations with minimum disruption to teaching and learning.

First aiders in our school have all undertaken appropriate training. They have a qualification in either First Aid at work (FAW, 3 days or 18 hours) or Emergency First Aid at work (EFAW, 1 day or 4-6 hours). Before the certificates expire, first aiders undertake a requalification course as appropriate, to obtain another three-year certificate.

Training will be updated every three years and will not be allowed to expire before retraining has been achieved.

FIRST AID KITS

We do not keep tablets or medicines in the first aid box.

A typical first aid kit in our school will include the following:

- A leaflet with general first aid advice
- Individually wrapped sterile adhesive dressings (assorted sizes)
- Regular and large bandages
- Eye pad bandages
- Triangular bandages
- Individually wrapped sterile wound dressings
- Adhesive tape
- Safety pins
- Disposable gloves
- Antiseptic wipes
- Plasters of assorted sizes
- Scissors
- Cold compresses
- Burns dressings
- Disposable Aprons
- Face covering

Our first aid boxes are located in the following places:

- Reception
- Main Office KS4
- KS3 staff planning area
- Life Skills Lodge
- KS3 Kitchen
- Food Technology Cabin
- Science Lab
- DT Cabin
- Art Room
- Thrive Hive
- KS3 Office

First Aid boxes are available in all school vehicles, in addition portable first aid packs are available for staff to take when attending off-site activities.

A white cross on a green background identifies all first aid boxes.

FIRST AID ACCOMMODATION

Learning Opportunities takes account of The Education (Independent School Standards) Regulations 2014 which requires schools to provide accommodation for the short-term care of sick and injured students, which includes a washing facility and is near to a toilet facility. The accommodation provided may be used for other purposes (apart from teaching) provided it is always readily available to be used.

Within the school accommodation is provided in the following areas:

KS4 Main Office / Area adjoining staff toilet

HYGIENE / INFECTION CONTROL

In order to maintain protection from disease, all body fluids should be considered infected. All staff take precautions to avoid infection and follow basic hygiene procedures. Staff have access to single-use disposable gloves and hand washing facilities and take care when dealing with blood or other body fluids and disposing of dressings or equipment.

Procedure in the event of contact with blood or other bodily fluids First Aiders should take the following precautions to avoid risk of infection:

- cover any cuts and grazes on their own skin with a waterproof dressing.
- wear suitable disposable gloves when dealing with blood or other bodily fluids.
- use devices such as face shields, where appropriate, when giving mouth to mouth resuscitation.
- wash hands thoroughly with soap and warm water after every procedure.

Spills of body fluids must be cleaned up immediately. Bodily fluids include blood, faeces, nasal and eye discharges, saliva, vomit.

Disposable towels should be used to soak up the excess, and then the area should be treated with a disinfectant solution. Never use a mop for cleaning up blood and body fluid spillages. All contaminated material should be disposed of in yellow waste bag. Avoid getting any body fluids in your eyes, nose, and mouth or on any open sores.

If a First Aider suspects that they or any other person may have been contaminated with blood and/or other bodily fluids which are not their own, the following actions should be taken without delay:

- wash splashes off skin with soap and running water.
- wash splashes out of eyes with tap water and/or an eye wash bottle.
- wash splashes out of nose or mouth with tap water, taking care not to swallow the water.
- record details of the contamination.
- take medical advice (if appropriate)

AUTOMATIC EXTERNAL DEFIBRILLATOR (AED)

Location of AEDs:

Five Bells Public House (located on the main road 258 opposite the school)

It is not the responsibility of Learning Opportunities to check that this defibrillator is in full working order.

RECORD KEEPING & REPORTING

All staff know where to locate the accident book and how to complete an entry.

First aid and accident record book

- An accident will be recorded by the first aider on the same day or as soon as possible after an incident resulting in an injury using the Accident record book.
- As much detail as possible should be recorded including, date, time of accident/incident, person's name, a brief summary of the accident and action taken.
- Records held in the Accident Register will be retained by the school for a minimum of 3 years, in accordance with regulation 25 of the Social Security (Claims and Payments) Regulations 1979, and then securely disposed
- The accident records are reviewed termly by a member of the Leadership Team to identify any potential or actual hazards.

The information in the accident books can:

- Help the school identify accident trends and possible areas for improvement in the control of health and safety risks.
- Be used for reference in future first-aid need assessments.
- Be helpful for insurance and investigative purposes.

Under the Data Protection Act 1998 and the General Data Protection Regulation (GDPR) 2018, all accident records containing personal information should be detached and kept in safe storage (e.g. in a lockable filing cabinet).

All completed accident books should be given to the Proprietor, who will store them for reference in future.

REPORTING to the HSE

Under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR) some incidents must be reported to the HSE (responsibility for which lies with the Proprietor).

Reportable injuries, diseases or dangerous occurrences include:

- Death
- Specified injuries, which are:
 - Fractures, other than to fingers, thumbs and toes
 - Amputations
 - Any injury likely to lead to permanent loss of sight or reduction in sight
 - Any crush injury to the head or torso causing damage to the brain or internal organs
 - Serious burns (including scalding)
 - Any scalding requiring hospital treatment

- Any loss of consciousness caused by head injury or asphyxia
 - Any other injury arising from working in an enclosed space which leads to hypothermia or heat-induced illness, or requires resuscitation or admittance to hospital for more than 24 hours
- Injuries where an employee is away from work or unable to perform their normal work duties for more than 7 consecutive days (not including the day of the incident)
- Where an accident leads to someone being taken to hospital
- Near-miss events that do not result in an injury but could have done. Examples of near-miss events relevant to schools include, but are not limited to:
 - The collapse or failure of load-bearing parts of lifts and lifting equipment
 - The accidental release of a biological agent likely to cause severe human illness
 - The accidental release or escape of any substance that may cause a serious injury or damage to health
 - An electrical short circuit or overload causing a fire or explosion

Information on how to make a RIDDOR report is available here:

How to make a RIDDOR report [HSE http://www.hse.gov.uk/riddor/report.htm](http://www.hse.gov.uk/riddor/report.htm)

Learning Opportunities will keep a record of any reportable injury, disease or dangerous occurrence. This will include: the date and method of reporting; the date, time and place of the event; personal details of those involved and a brief description of the nature of the event or disease. This record can be combined with other accident records.

Serious injury or death and how to deal with these events

- As a registered provider we would notify Ofsted of any serious accident, illness or injury to, or the death of, any child whilst in our care, and any action taken in respect of it.
- We would make the notification as soon as is reasonably practical, but within 14 days of the incident occurring.
- We would also notify the local child protection agency and act on any advice given.
- We would always follow our accident procedures in any accident or injury.

SPECIAL ARRANGEMENTS

Learning Opportunities acknowledge that in some cases students with medical needs may be more at risk than others. Staff may need to take additional steps to safeguard the health and safety of such students. In a few cases individual procedures may be needed and these will be detailed in an individual Risk Assessment / IHCP. The Head Teacher is responsible for making sure that all relevant staff know about and are if necessary are trained to provide any additional support these students may require.

CHILD PROTECTION

If any concerns are raised that have safeguarding implications (e.g. unexplained marks or scars), whilst a student is being treated for first aid, the First Aider must inform the Designated Safeguarding Leads (Simon Graydon / Kevin Dunk / Catherine Graydon), who will then take appropriate action.

PHYSICAL CONTACT WITH STUDENTS

The treatment of students for minor injuries, illness or medical conditions may involve members of staff in physical contact with students. Any treatment should:

- Not involve more contact than necessary
- Be undertaken by staff who have volunteered to be designated to the task
- Be carried out wherever possible, in front of another staff member
- Be recorded in the Accident Book
- Parents / carers will be informed if their student has received any treatment at school.

IDENTIFICATION OF STUDENTS WITH MEDICAL NEEDS

Some students may have medical conditions that are potentially life threatening such as epilepsy, diabetes and anaphylactic reactions. The medical forms for each new student are reviewed by a member of the Leadership Team and relevant information shared with staff.

TRAINING

All school staff are encouraged to undertake first aid training.

All first aiders must have completed a training course and must hold a valid certificate of competence to show this. The school will keep a register of all trained first aiders, what training they have received and when this is valid until.

APPOINTED PERSONS - completed a 1-day Emergency First Aid at Work (bespoke) Course

James Brodie
Christopher Turnbull
Roy Sabin
Christina Walters
Robert Ward
Kylea Browne
Sharon Grainger
Kevin Dunk
Zoey Hemmings-Cross
Paul Smith
Heather Tullett
Tony Hollett
Alison Barwell
Lou Scott
Catherine Graydon

LINKS WITH OTHER POLICIES

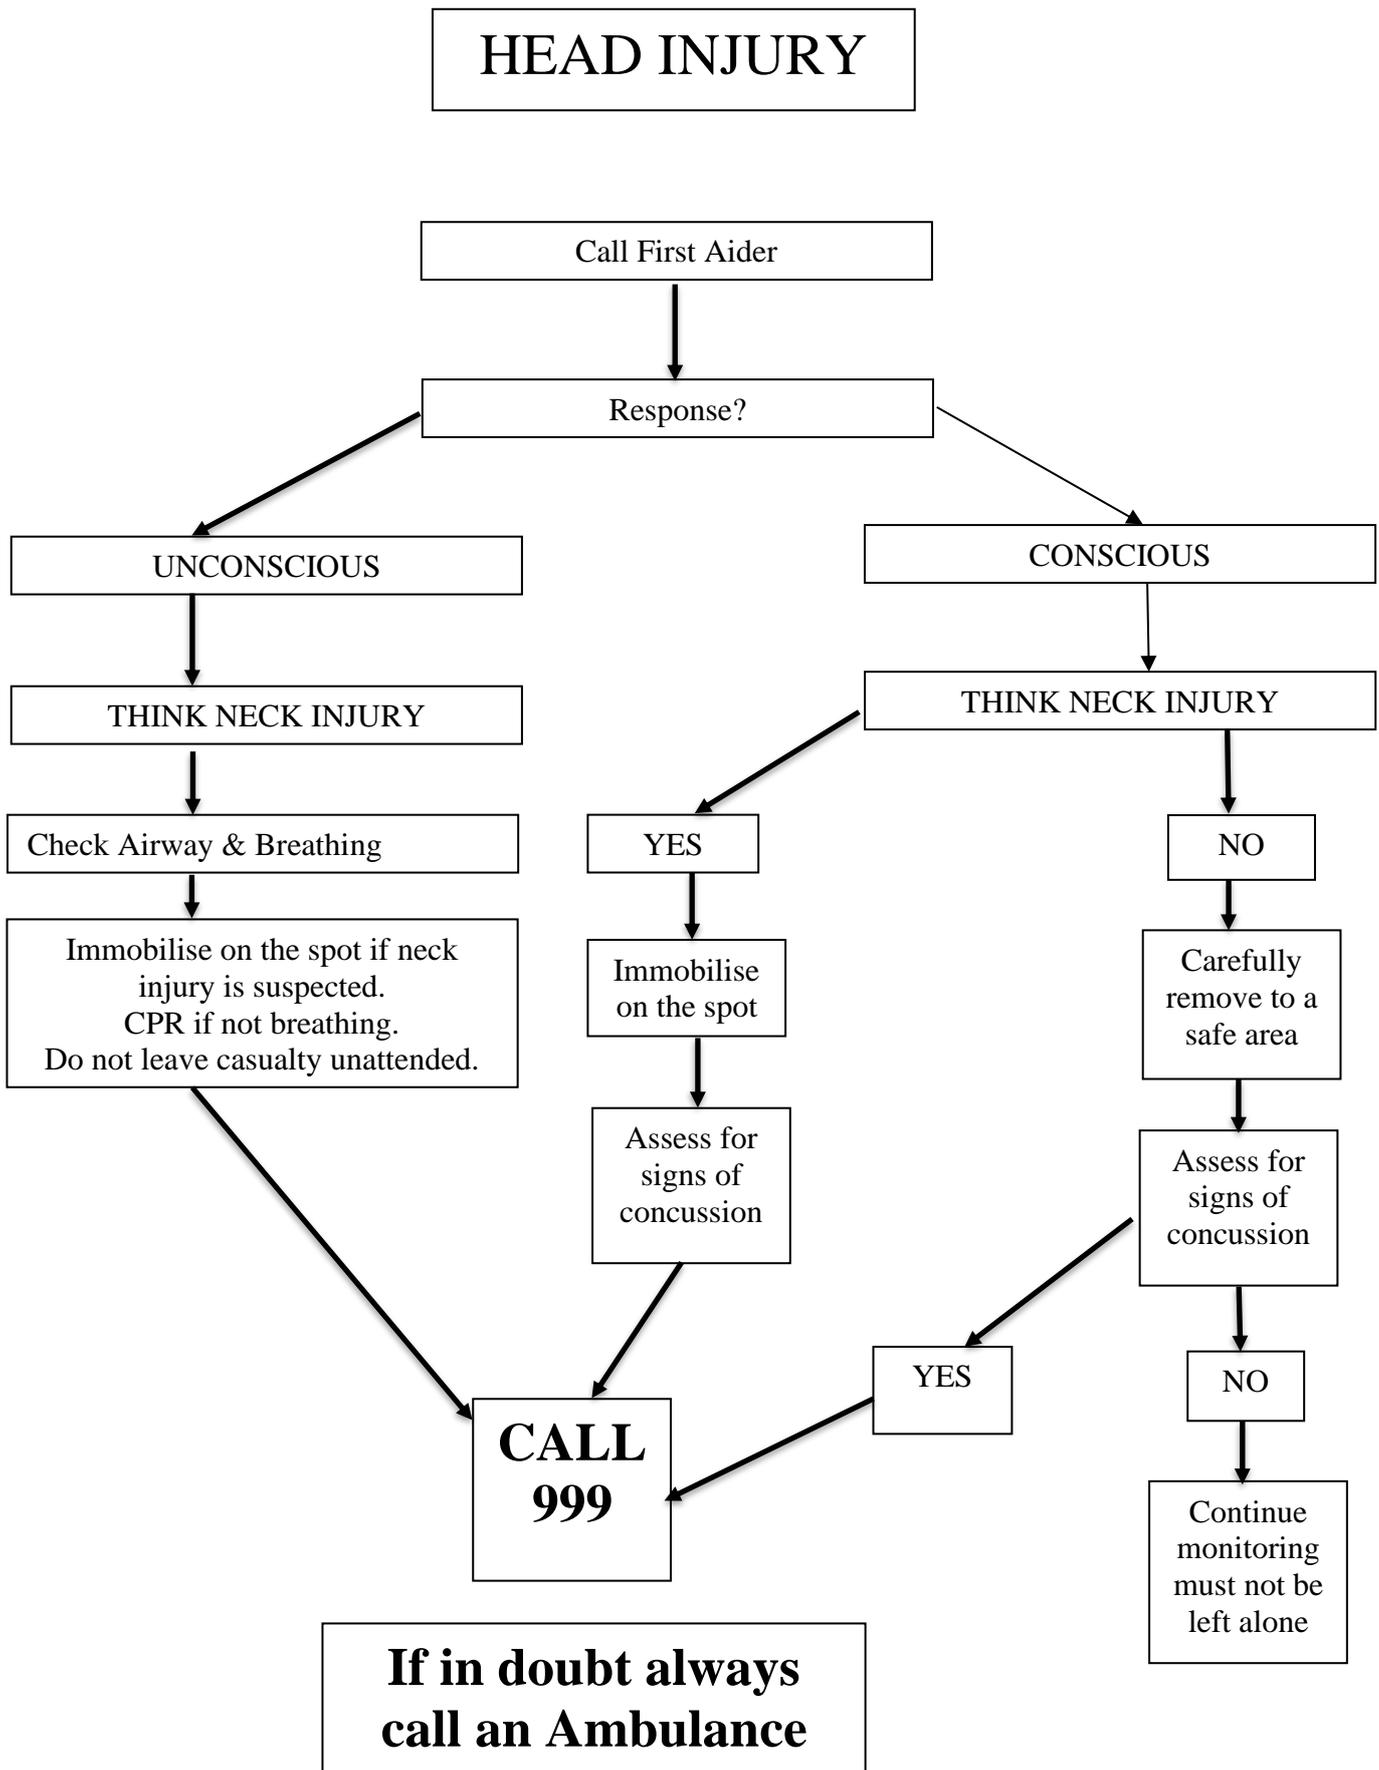

This first aid policy is linked to the:

- Health and safety policy
- Risk assessment policy
- Supporting Students with Medical Needs Policy

ADMINISTRATION OF MEDICATION (Refer to Supporting Students with Medical Needs Policy)

This applies to all students, including those who do not have an individual health care plan.

Medicines will be safely stored in the KS3 and KS4 Main Offices. A written record will be kept of all medication administered. This will include date, time, dosage and name of the member of staff who administers the medicine.

MINOR ACCIDENT PROCEDURES	
1	A First Aider to assess the student and if appropriate to treat the injury or seek additional medical assistance.
2	Accident record, located in KS4 main office, to be completed.
3	If the student needs to go home a member of the leadership team to make necessary arrangements. If the injury requires supervision then a first aider / appointed person to remain with the student until they are collected.

SERIOUS ACCIDENT PROCEDURES	
Under NO circumstances should a student be left unaccompanied if suffering from a serious injury and especially a head injury.	
1	First Aider to assess the situation and administer immediate first aid as appropriate.
	Ambulance to be called if required.
	Member of leadership team to be notified of the situation - parents / carers to be informed of situation (if an ambulance is not required they should be informed of the need to collect their child).
	Accident record to be completed.
If hospital treatment is required, but a car journey is more appropriate than an ambulance, then the following procedure should be followed.	
2	The parents / carers should be contacted and asked to meet the student at A&E.
	An insured driver plus First aider should take the student to A&E.
	A member of leadership team to be kept informed of events.

APPENDIX D Procedure to follow for dealing with injuries involving blood or bodily fluids

There is always at least one first aider on site and when attending off-site activities at all times and this person will be the one to deal with the injury.

Should bleeding occur at any time the following points should be followed:

- Put on latex gloves and a disposable apron.
- Try to stop the bleeding by applying pressure to the wound with a dry sterile dressing.
- Dispose of dressing into yellow clinical waste bag.
- Try and keep the person as calm as possible.
- Ensure there are 2 members of staff with the injured party so that if assistance is needed in any way one can remain with the person at all times.
- Deal with any spillage immediately using disposable items such as cloths, paper towels which can be thrown away, in the clinical waste bag, after the spillage is cleaned up. Clean the area thoroughly using diluted bleach 1 part bleach to 10 parts water.
- Ensure the area is clear of other students and adults to prevent cross contamination and spread of infection.
- Ensure all non-injured students are being cared for and reassured appropriately about what is happening.
- Replace the sterile dressing on the student/adult as often as needed as described in training.
- All waste should be treated as clinical waste and discarded in the yellow bags provided.
- Hands should be washed and dried thoroughly after the student/adult is cared for and any bleeding has stopped.
- If bleeding starts again a new apron and gloves must be put on to prevent infection.
- If you feel medical assistance is required call 999 and ask for an ambulance. If they need assistance but not as an emergency inform the parents / carers and advise them to visit their local A&E. If ever in doubt always phone for an ambulance, especially in the case of students.

Epilepsy

Emergency procedure to be followed in school

First aid for the student's seizure type will be included on their individual care plan. Staff will be advised on basic first aid procedures and the school has a team of qualified First Aiders.

There are several types of seizure but in most cases the sufferer falls to the ground and their body becomes rigid due to strong muscular contractions.

- Make sure the area is clear so that they don't hurt themselves
- If possible ease the student to the ground
- Do not move them unless they are in danger (top of stairs, by a road etc.)
- Stay calm; send for the First Aider, giving the name of the student
- Note the time the seizure started
- Put something soft under their head (jacket or cushion) or gently cup their head with your hands to stop their head hitting the ground
- Get a responsible person to move other students away
- DO NOT put anything into their mouth, or restrain them - allow the seizure to happen

After the seizure

- Check their breathing
- Make sure that the airway is clear.
- If breathing, place in the recovery position
- Monitor and record vital signs: pulse, breathing rate and level of response
- Be prepared to commence cardiopulmonary resuscitation (CPR)
- Note the length of time of the seizure
- They may be confused and disorientated, so talk calmly and reassure the student
- The student may also have been incontinent, in which case cover them with a blanket to avoid potential embarrassment and preserve their dignity
- The after effects may be: a bitten tongue, headache, aching limbs and exhaustion
- Inform the parents at the earliest opportunity

Call an ambulance (following the school procedure) if:

- It is the student's first seizure
- If the seizure lasts for 5 or more minutes and they have not been prescribed emergency medication
- If the seizure lasted for 5 minutes or more and they have been given emergency medication
- They have trouble breathing after the seizure has stopped
- They have not regained consciousness after more than 10 minutes
- They have repeated seizures
- They may have sustained an injury

Collapse

Emergency procedure to be followed in school

Anyone finding a collapsed individual should shout for help then:

1. Call 999 and request an ambulance (following the school procedure)

Please state the exact location of the casualty clearly

2. Alert a member of the leadership team and trained First Aiders

3. Send a runner to take the AED located at the Five Bells Public House to the casualty.

□ The First Aider/s will make their way immediately to the casualty

□ CPR will be started as soon as it is established that the casualty is unresponsive and not breathing normally by the first trained person on the scene. The AED machine will be connected to the casualty as soon as it arrives.

□ Any First Aiders not directly involved with CPR will assist with:

1. The safety of the casualty

2. Moving away any bystanders

3. Being ready to take over CPR if the other First Aiders become tired

4. Organise for someone to meet the ambulance crew and direct them to the location of the casualty as quickly as possible

A member of the Leadership Team will be responsible for contacting the next of kin as soon the situation allows.

Your actions could save a life.

A cardiac arrest is when someone's heart suddenly stops beating, and their breathing is abnormal or has stopped.

Without quick action, the person will die.

Check for danger, then immediately follow these simple steps to give the person their best chance of survival:

- 1. Shout for help.**
 - Shake them gently.
- 2. Look and listen for signs of normal breathing.**
 - Look for the rise and fall of their chest.
- 3. Call 999. Put the phone on loudspeaker and tell them you are with someone who is not breathing.**
- 4. The ambulance call handler will tell you where the nearest automated external defibrillator (AED) is. If someone is with you, ask them to fetch it and bring it back.**

Do not leave the person if you are on your own.

5. Start chest compressions:

- interlock your fingers
- place your hands in the centre of the chest
- push down hard and then release twice per second, and don't stop.

The ambulance call handler will help you.

- 6. If you have a defibrillator, switch it on and follow the instructions. It will tell you exactly what to do.**

7. Continue CPR until:

- the AED asks you to pause while it reanalyses and gives another shock if needed
- a paramedic arrives and tells you what to do
- the person shows signs of life.

If a child is suspected of having an infectious disease advice should be sought from the appointed person who will follow the Health Protection Agency guidelines below to reduce the transmission of infectious diseases to other pupils and staff.

UK Health
Security
Agency

Should I keep my child off school?

Yes

	Until...
Chickenpox	at least 5 days from the onset of the rash and until all blisters have crusted over
Diarrhoea and Vomiting	48 hours after their last episode
Cold and Flu-like illness (including COVID-19)	they no longer have a high temperature and feel well enough to attend. Follow the national guidance if they've tested positive for COVID-19.
Impetigo	their sores have crusted and healed, or 48 hours after they started antibiotics
Measles	4 days after the rash first appeared
Mumps	5 days after the swelling started
Scabies	they've had their first treatment
Scarlet Fever	24 hours after they started taking antibiotics
Whooping Cough	48 hours after they started taking antibiotics

No

but make sure you let their school or nursery know about...

Hand, foot and mouth	Glandular fever
Head lice	Tonsillitis
Threadworms	Slapped cheek

APPENDIX H

SIGNS & SYMPTOMS OF SCARLET FEVER

Scarlet fever is a common childhood infection caused by *Streptococcus pyogenes* or group A *Streptococcus* (GAS). The early symptoms of scarlet fever include sore throat, headache, fever, nausea and vomiting.

After 12 to 48 hours the characteristic red, pinhead rash develops, typically first appearing on the chest and stomach, then rapidly spreading to other parts of the body, and giving the skin a sandpaper-like texture. The scarlet rash may be harder to spot on darker skin, although the 'sandpaper' feel should be present.

Patients typically have flushed cheeks and pallor around the mouth. This may be accompanied by a 'strawberry tongue'. As the child improves peeling of the skin can occur.

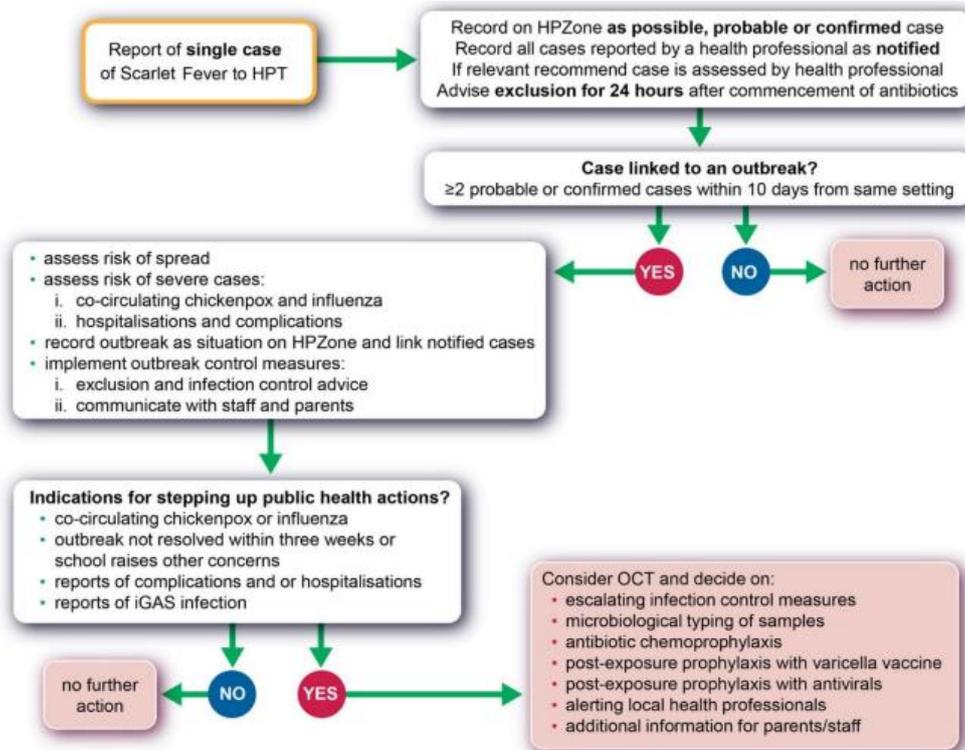

Infection control advice

In schools it is recognised that infections can be spread through direct physical contact between children and staff and through shared contact with surfaces such as table tops, taps, toys and handles.

As per national 'Guidance on Infection Control in Schools and other Child Care Settings', children and adults with suspected scarlet fever should be excluded from school / work for 24 hours after the commencement of appropriate antibiotic treatment. Good hygiene practice such as hand washing remains the most important step in preventing and controlling spread of infection.

If we suspect an outbreak at our school we will contact the Health Protection Team for advice who will then provide a letter and Frequently Asked Questions to cascade to staff and parents / carers if appropriate.

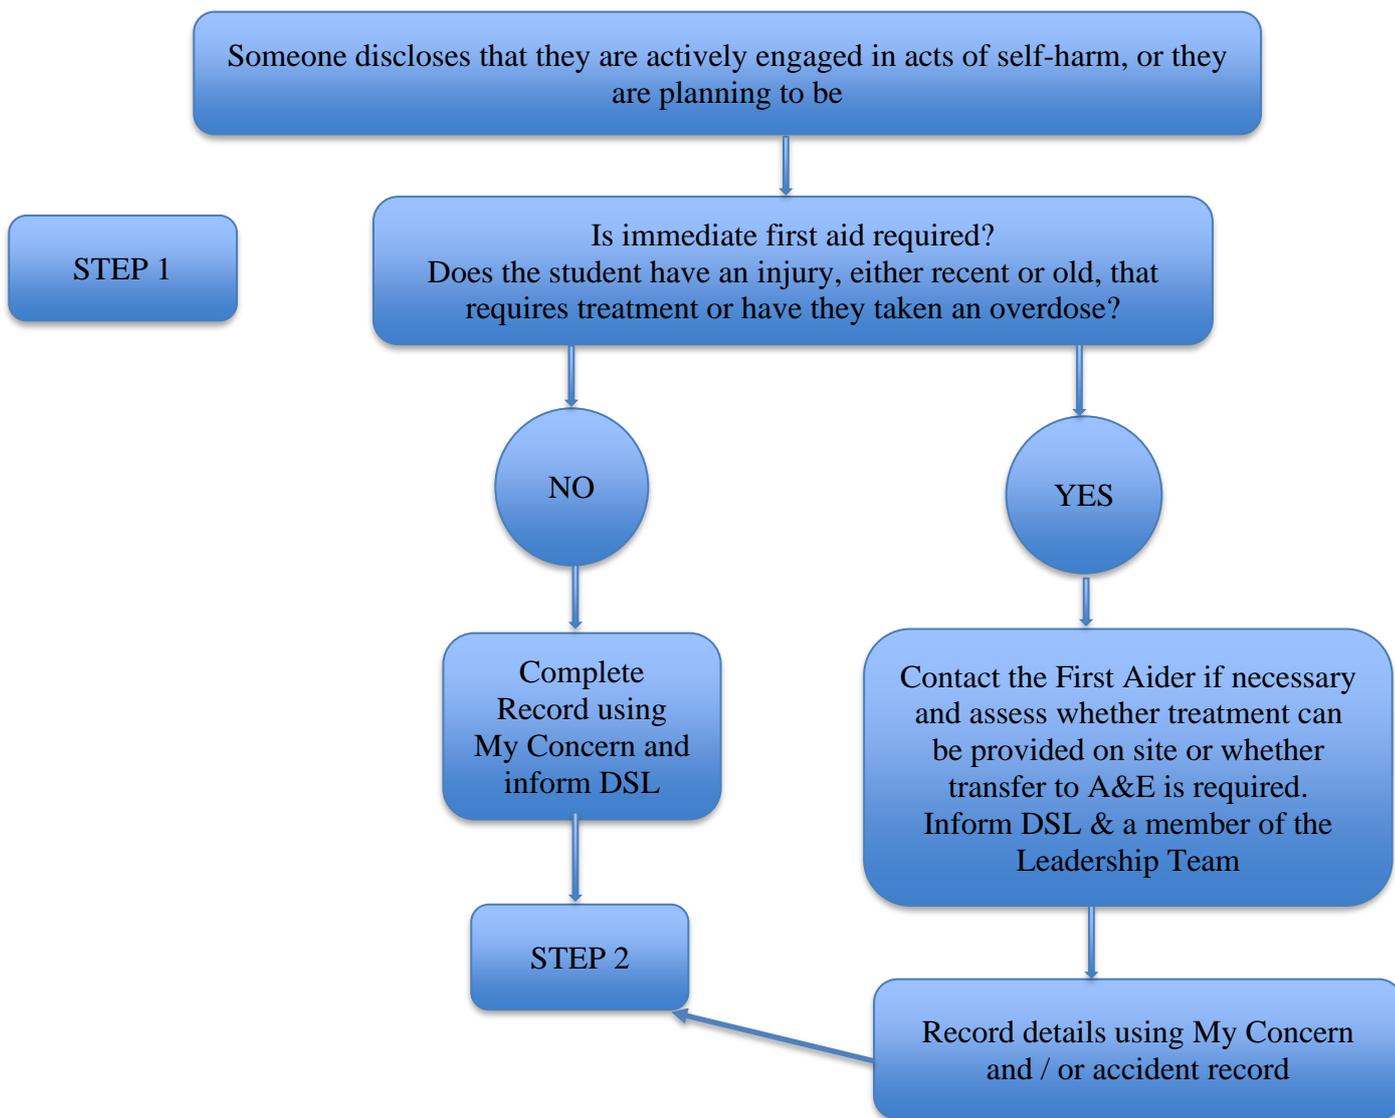

Algorithm for public health management of scarlet fever cases and outbreaks in schools

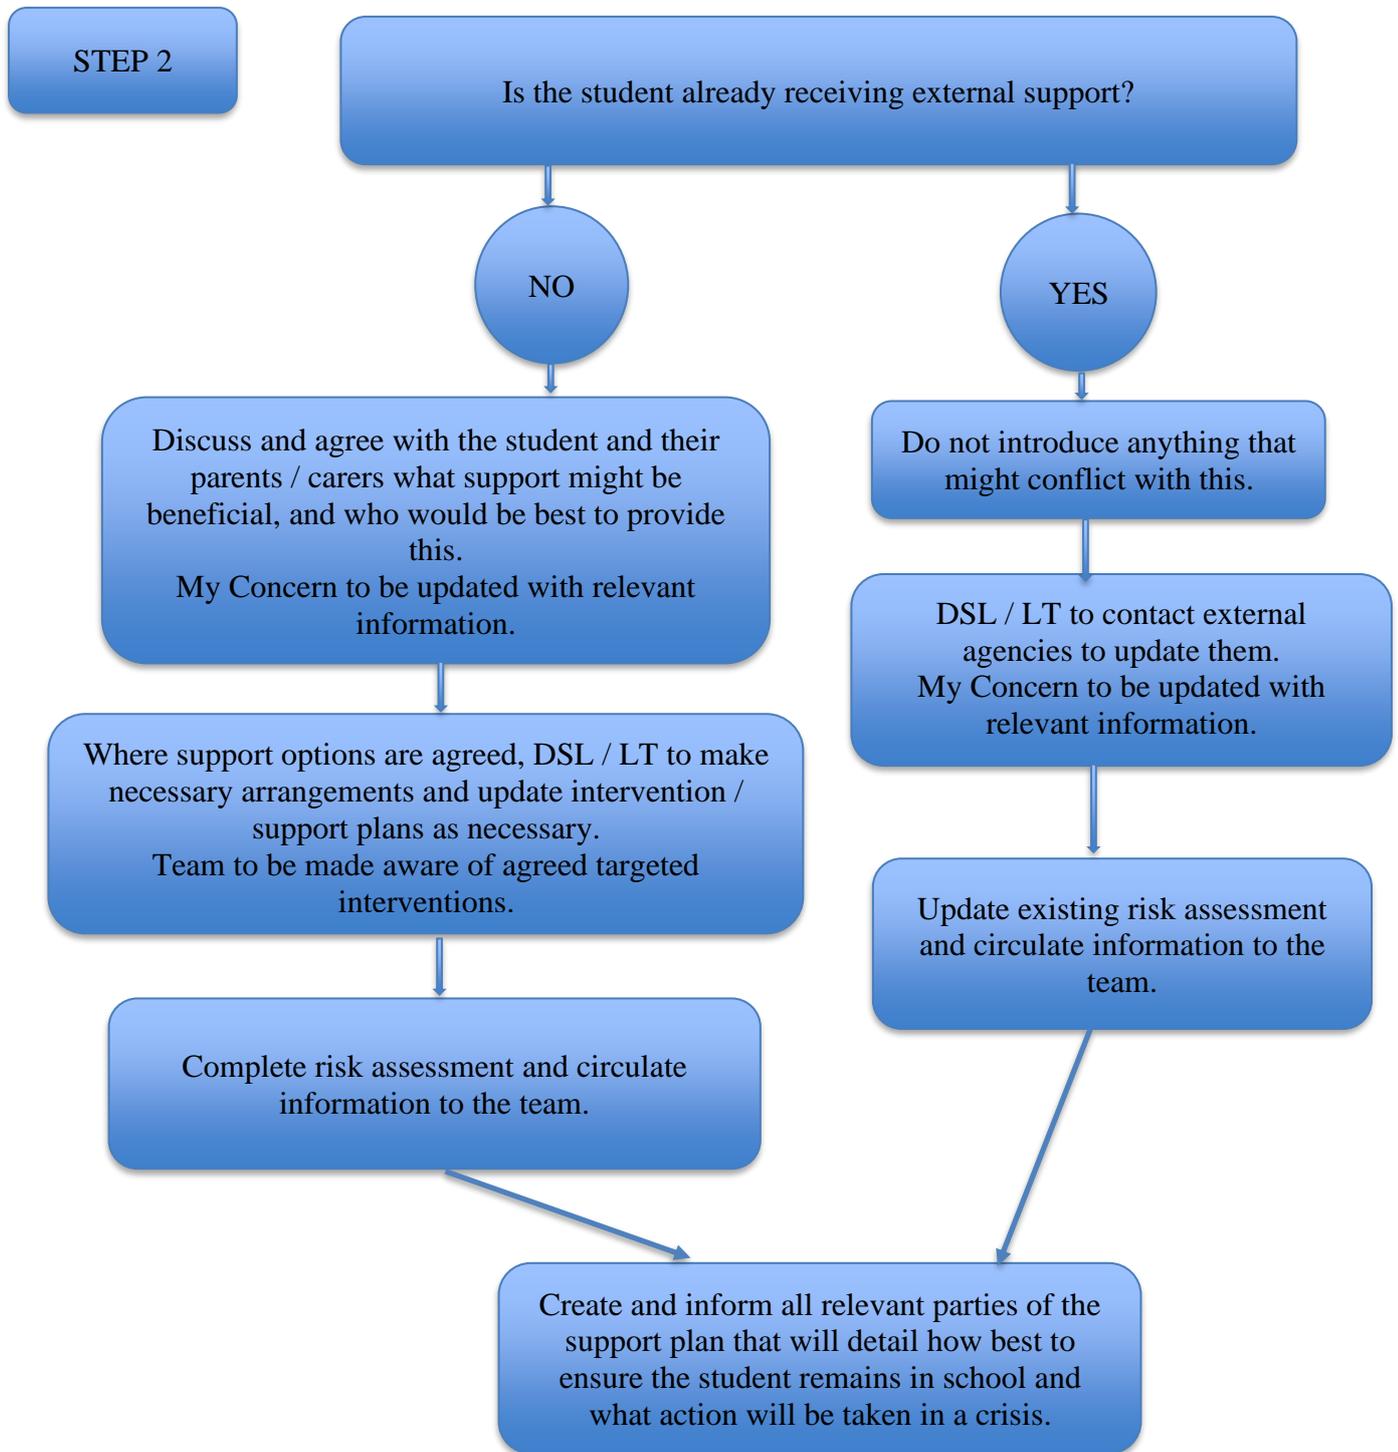

Self-harm is an umbrella term to describe a wide range of behaviours. These are split into 2 sub-categories:

- Self-injury: Harming or injuring oneself e.g. cutting, burning, burning the skin, drinking or eating poisons and other acts of self-mutilation.
- Harmful Behaviours: Behaviours which could result in long-term harm e.g. over/ under eating, drug misuse, binge drinking, and smoking.

Flowcharts to Aid Decision-Making around Self-Injurious Behaviours

Informing Parents/Carers

It will be LT's decision as to when and how parents/carers are informed. This will be done with sensitivity and the meeting will be used to inform Support Plans and Risk Assessments used in school.

Use of preventative strategies

All students who are at risk of self-harm will have an individual risk assessment which will contribute to the information within targeted intervention / support.
